City of Dilley Receives Grant Funding to Construct New Water Well

The City of Dilley has been granted \$2.1 Million in funding from the Texas General Land Office for the construction of a new water well.

“The creation of this new well will ensure the prosperity of our community for generations to come” said Henry Arredondo, City Administrator. “As a growing community in a semi-arid region it is vital, we ensure a steady supply of water for our residents.”

Once completed the new well will provide users of the city’s public water system with an alternative supply source. It will create a redundancy that will ensure supply is met in times of increased demand and drought.
